EDUCATION DETAILS

Degree/Exam	Institute	Year	CGPA/Marks(%)
B.Tech in Information Technology	Sankalchand Patel College of Engineering	2023-2027	8/10
12 th ,G.S.E.B	Gokul Science School,Siddhpur	2023	55%
10 th ,G.S.E.B	H.P High School,Unava	2021	92%

TECHNICAL SKILLS

- **Languages:** Java, C, Python, HTML, CSS, JavaScript, SQL
- **Framework & Libraries:** Node.js, Express.js, React.js, Scikit learn, Pandas, Numpy, Matplotlib, Seaborn, Selenium Web-Driver, TestNG
- **Tools:** Git & GitHub, MongoDB, Postman, MLFlow, AWS, BentoML, Antigravity

PROJECTS

- **Personal Portfolio Website**
 - Designed and developed a responsive personal portfolio website to showcase projects, technical skills, certifications, and achievements.
 - Built an interactive and modern user interface with smooth navigation, animations, and mobile-friendly layouts for an enhanced user experience.
 - Technologies Used: React.js, HTML5, CSS3, JavaScript, Tailwind CSS/Bootstrap, EmailJS, GitHub, Vercel.
- **WanderLust – Airbnb Clone**
 - Developed a full-stack vacation rental web application inspired by Airbnb, enabling users to browse, create, edit, and manage property listings.
 - Designed a responsive and user-friendly interface with CRUD operations, review management, and robust backend validation.
 - Technologies Used: Node.js, Express.js, MongoDB, Mongoose, EJS, HTML5, CSS3, Bootstrap, JavaScript, Passport.js, Cloudinary, Mapbox, Git.

CO-CURRICULAR ACTIVITIES

- **SSIP Participant(AI-Powered Fire Safety Drone) (December 2025)**
 - Designing and developing an intelligent drone system capable of detecting fire and smoke in real-time using AI-based computer vision techniques.
 - Implementing real-time image processing using OpenCV and deep learning models (e.g., CNN/YOLO) for accurate fire detection from live video feed.
 - Integrating multiple sensors (temperature, gas, flame) with microcontrollers to enhance detection reliability and reduce false positives.
 - Technologies Used: Python, OpenCV, Machine Learning, Arduino/Raspberry Pi, IoT, Mission Planner, Sensors (MQ, Flame, Temperature).
- **IoT Project(Smoke Detection System) (May 2024)**
 - Designed and developed an AI-powered smoke detection system capable of identifying smoke in real time using computer vision techniques.
 - Implemented image processing and deep learning models (e.g., CNN/YOLO) with OpenCV for accurate smoke detection from live video streams.
 - Optimized the detection pipeline to reduce false alarms and improve detection accuracy under varying environmental conditions.
 - Technologies Used: Python, OpenCV, TensorFlow/Keras, YOLO, Computer Vision, Deep Learning, NumPy.

CERTIFICATION

- I have successfully completed 10-week virtual internship during October -December 2025 , Supported by:- India Edu Program (AICTE).
- I have Course certificate of web development by supported infosys.
- Other course certificate like:-AIML by L&T education organized by our Sankalchand Patel University.
